

Project:

Laundry Equipment for the “Sister Cecilia Home for the Elderly”.

Description:

Sister Cecilia Home

To provide for and improve the living conditions for 52 residents of the Sister Cecilia Home for the Elderly by upgrading their laundry services. Presently the equipment used are for domestic use, two dryers and three washing machines of which only two washers are working. Bedding and cloths are washed six days a week but because these are not commercial washers it can only handle small loads at a time and soiled bedding /cloths have to be washed by hand first before loaded into these washers.

The Sister Cecilia Home provides residential and out-patient care for over one hundred persons.

There is a laundry staff on hand at the Home and any technical difficulties with the equipment will be handled by trained technicians from "Belize Dry Cleaners", the company that did the research on the equipment required and provided the costs for this project.

Duration:

Once this becomes a “matching grant” the time involved will depend on delivery once equipment is ordered, processing at customs and delivery and setup at location.

Belize Rotary Club support will take the form of customs clearance, transportation within the country, and project supervision. In terms of financial support, Belize Rotary are prepared to contribute US \$1000.00

Costs:

Washers

SC60MN2 Speed Queen 60lbs Washer Extractor 4-cycle mechanical control
2-speeds stainless steel panels 200-240/60/3PH **\$ 6898.00 US**

Or
